Dear Ms. Payne:

It has come to my attention that the Transportation Security Administration (TSA) is considering Mr. Patrick Bienvenu and his staff at Airus Media, Inc. (airportONE.com) for a potential prototype project.

As director of three airports in Okaloosa County, Florida including the Northwest Florida Regional Airport (VPS) and as the immediate past president of the Florida Airports Council (FAC), I have had the opportunity to work directly with Mr. Bienvenu on numerous projects over the years. These projects have included several promotional videos and commercials produced by Airus Media for Northwest Florida Regional Airport and Crestview Airport, filming and production of the Florida Airports Council educational series of seminars totaling twenty-six to date. Mr. Bienvenu's company also provided production services for a statewide air service development video that was presented to the State Legislature and Governor Scott.

His work has always exceeded our expectations and the Airus Media team has always performed with the highest level of professionalism. Project deadlines have been dependably met and the end quality of the product has been extraordinary.

More importantly, he has a particular passion about his work that seems to drive his desire to be innovative and to go beyond what is typically expected. The Airus Media team is truly talented and dedicated to making sure that client objectives are totally satisfied on time and within budget.

Should you choose to use Airus Media for this project, I have absolute confidence that their performance and resulting product will exceed your expectations.

Please do not hesitate to call me at (850) 651-7160 if you have any questions about Mr. Bienvenu or Airus Media's past performance for Okaloosa County and the Florida Airports Council.

Sincerely,

Greg Donovan, A.A.E.
Airports Director
